About The Club

Photography is the science, Art, Application and practice which is a result of several technical discoveries.

Photography club is formed at QISIT to debate the students in this field and finding out one's self creation in a certain domain thereby extending their learning. This develops knowledge and their internal power and imagination by showcasing the photos with what elements to exclude, what angle to frame the photo, to express an impression of an objects in a subjective form.

Movie making is a gateway to build community among students, hone students' writing, engage students' creative imaginations, and instil imaginations to build confidence. Thus to bring out talents among the students QISIT has started a "Photography Club" to motivate them and inspire them to excel their career in the field of interest of photography.

The art or practice of capturing and processing photograph is called photography. Photography is all about study of light, composition and a good understanding of the equipment. Photography club of Sigma College of Architecture organizes activities to enable the members to get a chance to learn photography, utilize their camera to the fullest and become sensitized to the world around us.

Statement of Purpose

The mission of the Photography Club is to provide a supportive environment for interested photography students to share their creativity, knowledge and passion for photography while attending any competitions. The club will hold regular meetings and discussions and organize events such as; photo-walks, field trips, museum and gallery visits, and lectures and workshops by visiting artists. Members will also explore the possible opportunities for photography projects in collaboration with other campus departments, organize peer to peer portfolio reviews and explore the possibilities of exhibitions on and off campus.
